| • Web Systems and Technologies | • Project Management | • Human-Computer Interaction |

Experience

Technoshine Trading International **January 2026 - April 2026**
Fullstack Developer Intern

- Developed a complete web-based management system for the Fraternal Order of Eagles from front-end to back-end implementation.
- Built an administrative dashboard for managing users, records, and system data.
- Developed responsive front-end interfaces for two corporate websites: Technoshine Trading International and Technoshine Construction.
- Collaborated with the development team to implement new features and maintain existing applications.

Projects

OkSi: An Environmental Monitoring and Watering System for Okra and Siling Labuyo Cultivation in Urban Farming | *React, C++, IoT*

- Built a cross-platform mobile application using React Native (Expo) for remote monitoring, notifications, and environmental data visualization.
- Integrated the mobile application with cloud services to enable real-time synchronization between the IoT device and users.

Nutripets (E-commerce Website for Pet Supplies) | *PHP, MySQL*

- Collaborated on the development of a full-stack e-commerce website using PHP and MySQL.
- Developed assigned front-end and back-end features using PHP, MySQL, HTML, CSS, and JavaScript.

Technical Skills

Languages: *C++, Javascript, PHP, and Dart*

Developer Tools: *Visual Studio, Android Studio, Cisco Packet Tracer, and Arduino IDE*

Technologies/Framework: *Flutter, Ionic, React Native, and ReactJS*
